THE PLATFORM

One Integrated Platform, End to End

Flash WMS combines Order Management (OMS) and Warehouse Management (WMS) in a single system. The moment an order is placed, warehouse execution begins automatically — from order receipt through picking, packing and outbound handoff.

CORE MODULES

8 Modules. Complete Coverage.

Every module is connected — actions in one layer automatically trigger the next.

01 Order Management Multi-channel sync · auto inventory allocation · real-time order tracking	02 Inbound & Receiving PO-based receiving · quantity verification · QC inspection · system putaway
03 Inventory Management Location · SKU · lot · expiry date · real-time availability status	04 Wave Planning & Picking Smart order batching · optimized pick path · step-by-step operator guidance
05 Packing & Outbound Scan verification · packaging instructions · auto label print · packing video	06 Returns Management Platform auto-sync · QC grading on arrival · unboxing video per return
07 Alerts & Exceptions Low-stock alerts · overdue order flags · picking anomaly push notifications	08 Dashboard & Analytics SLA fulfillment rate · labor productivity · order flow — real-time KPIs

WHY FLASH WMS

Built Different. Because We Operate Warehouses Too.

Flash WMS is not just a software vendor — we run our own warehouse operations across 6 Southeast Asian countries. Every feature was built because we needed it ourselves.

01 Execution-First Design

Most WMS record transactions. Flash WMS controls execution — every step requires a scan, confirmation, or system-directed action. Consistent accuracy even with high staff turnover.

02 3PL-Native Architecture

Multi-client isolation, flexible billing and client self-service are built into the core — not bolted on as an afterthought.

03 SEA Platform Integrations

Native integrations with Shopee, Lazada, TikTok Shop, Flash Express and major regional carriers. Clients without a system get OMS access out of the box.

04 Consulting-Backed Implementation

You don't go live alone. We bring the operating model first, then configure the system to your actual warehouse flow — not a generic template.

05 Built for Regional Expansion

Same platform across every new site. We already operate in 6 Southeast Asian countries — when you expand, we're already there.

GET STARTED

Request a Demo Built Around Your Operation

Schedule a live demo tailored to your warehouse type — 3PL, e-commerce or distribution. We'll walk you through the modules most relevant to your operation.
